NEW FOREST DISTRICT 2001 CENSUS PROFILE

This information has been compiled from the 2001 Census which took place on April 29th 2001. It is a sample of the data which is freely available on the Neighbourhood Statistics website, www.neighbourhood.statistics.gov.uk

Notes regarding definitions can be viewed on the neighbourhood statistics web site or contact James Ives in the Policy & Plans Team on 023 8028 5351.

A summary of some key findings from the Census and analysis for New Forest District is presented below. This is followed by Census profiles for each of the District's wards.

Age Structure

- The number of people resident in the District on Census night 2001 was 169,331. This was an increase of 5.5% over the period 1991 – 2001.
- The proportion of the population aged 60 or over in 2001 was 28.3% an increase of 0.79% on 1991 and the highest proportion in this age group of any district in Hampshire¹.
- The proportion aged 0-15 was 18.1%. This was about the same as in 1991, although those in the 0-4 age group was 0.8% lower than in 1991.
- The proportion of young people (16-24) was the lowest in Hampshire at 8.03%. The average for the County was 11.5%.
- The number of people who described themselves as belonging to one of the "non-white" ethnic groups was 1,935 or 1.1% of the District population.

Health & Unpaid Care

- The number of people with a limiting long-term illness increased from 17,597 (11% of total population) in 1991 to 30,223 (17.8%) in 2001. This was the second highest percentage in Hampshire.
- Two new questions were asked in the 2001 Census on people's general health and the provision of unpaid care. In New Forest District 92.4% of people said that their health was good or fairly good. In response to the care question, 10.5% of people were providing unpaid care, which was the highest proportion in Hampshire.

Housing & Household Characteristics

- The number of household spaces increased by nearly 6,000 between 1991 and 2001 to 74,835. In the 2001 Census 1,172 of these household spaces were recorded as second or holiday homes, amounting to 1.6% of total household spaces. Between 1991 and 2001 the proportion of detached, terraced and flatted household spaces all decreased slightly, whilst semi-detached increased.
- In 2001 80.2% of the housing stock was owner-occupied, an increase of 0.75% from 1991. The proportion in the social rented sector decreased by 0.72% over the same period to 10.1% of households.

- There were 12,445 (17.3% of occupied households) lone pensioner households in New Forest District in 2001 an increase of nearly 15% from 1991 and the highest proportion in Hampshire. The number of single person households also increased by nearly 23% to 19,933 (27.7%), whilst the number of lone parent households with dependent children increased by more than 90% over the same period to 3,126 (4.3%).

Economic Activity

- Between 1991 and 2001 the overall economically active population increased by 6.8% to 79,531. However the increase was accounted for entirely by the increase in the female workforce; female economic activity increased by 16.4%, whereas there was a slight decrease in male economic activity of 0.2%.
- Total full-time and part-time employment increased by 5.5% and 13.2% respectively, whilst the number of self-employed increased by 8.1%. The number of economically inactive (retired, inactive students and others) remained the same at about 42% of the 16+ population. The largest increases between 1991 and 2001 were in female full-time (+11.7%), female part-time (+13.3%), male part-time (+12.5%), and in the female self employed (+31.7%) categories.

Cars & Vans

- The number of households with cars in the District increased from 53,563 in 1991 to 61,749 in 2001 an increase of 15%. The number of households with no car decreased by about 1,600 between 1991 and 2001, and in 2001 stood at 10,236 or 14.2% of households.

Note¹ 'Hampshire' refers to Hampshire County Council area as well as Portsmouth and Southampton unitary authorities.
